Llyn Gwynant Barns floor plan showing

Table Plan C:

Individual tables for up to 120 people

The table plan for up to 120 people uses all our 8 ft rustic wooden tables (12 tables in total) as individual tables with 4 people on each side and one on each end. Note that 3 of the tables (2 orange and 1 green in the plan above) are at right angles to the rest as they will not fit when running the same way as single tables, without blocking access to the Bar.

A top table can be positioned on the stage using our lightweight plastic topped tables, usually seating around 6/8 and coloured yellow on the plan, in which case you can omit one of the green tables and have the orange ones aligned in the same way as the others. For fewer guests, say 100, both green tables can be removed and the orientation of the two orange tables made the same as the others. If you wish to use the plastic trestle tables on the stage, then you can hire the plastic trestle tables and white tablecloths for them, or else bring your own.
